Keep Quality Education Thriving
Invest in KTEC

When you support the Kenosha School of Technology Enhanced Curriculum, you support a high performing, 4K-8th Grade technology-focused charter school.

Since 2007, KTEC has excelled in student achievement, quality technology-based learning programs and learning labs attended by teachers from many Wisconsin districts.

Why invest in KTEC?

#1: KTEC Is a Winner
- Above the state average every year in every Wisconsin state assessment area
- Thriving programs in Project: Lead the Way (PLTW), LEGO Robotics, and Food for Learning—geared to prep students for STEM (Science, Technology, Engineering and Math) careers
- A learning laboratory providing PLTW and LEGO Robotics training to visiting staffs (local and national)
- Partnerships with Carthage College, Gateway Technical College, and Snap-On Tools

#2: KTEC Has Needs
- As a charter school within the KUSD public school system, KTEC thrives by being 1) financially responsible and 2) highly creative in fundraising. However, KTEC receives 80% of the regular public school's per student allocation. So in order to continue to thrive, KTEC depends upon your donations in addition to annual fundraising efforts.
- KTEC's STEM-focused programs require state-of-the-art technology, such as iPads, CAD programs, interactive whiteboards, and digitized language labs. And with expansion to a second site, equipment needs double. Site modernization is necessary, along with upgrades to existing programs and hardware.
- KTEC staff are certified to teach PLTW and LEGO Robotics, but both initial training and updates require funding. Your donations support this and KTEC hosted Visitation Days for educators seeking to learn and replicate the quality programs KTEC offers.

What will your donation do?

Your wise investment in KTEC pays these dividends:
- Highly skilled workers who are thinkers, problem solvers and team players because that's what KTEC students do every day
- Two KTEC sites, KTEC East and KTEC West, equipped to provide a state-of-the-art, technology-based learning environment to support STEM learning

- Staff trained to deliver PLTW, LEGO Robotics, the Food for Learning Projects and all instruction in a way that engages students in the kind of thinking and use of technology that prepares them for future success
- KTEC's staff trains other staffs around the state and nation to replicate their successes
How can you donate to KTEC?
Go to KTEC’s website http://ktec.kusd.edu/fundraising/ where you will find a link to the Kenosha Community Foundation, the organization handling KTEC’s major donations and tax deduction opportunities. You will also discover details about the Fit for Growth Campaign, which is part of KTEC’s Endowment Fund. In its first year, this campaign triggered a Gala dinner with silent auction, 5K Run and Harvest Ball. Money raised was deposited in the KTEC Endowment Fund and used to purchase iPads and support continuing technology needs of the school.

“Fit for Growth”
That’s the motto for the Kenosha School of Technology Enhanced Curriculum fund raising. And it fits. In 2014, KTEC’s expansion to a second campus doubled the initial enrollment from 2007. Highly trained staff engage students in learning supported by state-of-the-art technology. Delivering this level of instruction requires an investment. Whether you are a local business or an individual donor, your donation will ensure that KTEC students get a quality learning experience.
