Child Find Screening and Evaluation

Early Childhood screenings and evaluations are provided to children 3-5 years old living in the Kenosha Unified School District who may be experiencing difficulty in any area of development.

A child's development can be checked through an Early Childhood Developmental Screening. During a screening, information is collected about the child's developmental skills in the areas of speech/language, motor, cognition, self-care and social. Information is collected through parent interviews, observations and interactions with each child. The screening helps to identify if a possible developmental delay may exist. If a possible developmental delay is identified, a referral for an evaluation may be made.

An Individualized Education Program (IEP) Team evaluation is conducted to determine if a child has a developmental delay and a need for special education services. During an evaluation, formal testing will be completed in one or more areas of development. If a disability is identified, an Individualized Education Program (IEP) is developed.

These services are provided at no cost by Kenosha Unified School District.

If a parent or guardian is interested in requesting an Early Childhood screening, he/she should call:
