FALSE ALARM AT INDIAN TRAIL

KENOSHA, Wis. (Monday, Oct. 4, 2021) – Today, around 10 a.m., Indian Trail High School and Academy students and staff were notified via the alarm system to implement [ALiCE](#), which includes barricading and evacuating among other tactics. It is believed that the system was triggered due to a device malfunction, which is still being investigated.

The Kenosha Police Department arrived on the scene and did a full sweep of the building out of an abundance of caution for the safety and security of all. Shortly after 11 a.m., families were notified that clearance was received from KPD and schedules were altered to ensure all students received a lunch period due to the timing of the incident.

The malfunction is under investigation and alarm procedures are being reviewed to ensure this does not happen again. While this incident was frightening and an inconvenience, it is important to note that the students and staff did a great job implementing the practices and procedures they have been taught to follow in an intruder situation.

The district is appreciative of the support of our local law enforcement, as well as the families, students and staff of Indian Trail.
