

Find out how your child
is *really* doing...with a

SYLVAN INSIGHT ASSESSMENT

If your child's grades seem okay, but you're sensing something is off, **trust your gut!** It might be a signal that they're missing critical foundational skills. It's easy to miss when grades are no longer painting the full picture. A **Sylvan Insight™ Assessment** will tell you where your child really stands academically.

Here's what you get with Sylvan Insight™

- A computer-adaptive skills assessment that will pinpoint your child's exact strengths and skill development needs.
- Deep insight into your child's habits and attitudes toward school.
- A view into how your child's skills compare to national norms for other kids in their grade level.
- A follow up strategy session with our team to review the results and your personalized action plan for success!

Get in touch today, and let's put your child on the path to success!
