How to Save to Home Directory's in Windows

To begin saving a document, students should, choose the **File** | **Save As** button from within the application.

When saving on a PC, students will need to navagate to their H drive which is there home directory.

On the students desktop there will be a shorcut to the students desktop named Hdrive. Home directories are where all of the students files should be saved. Double click the shortcut to open the home directory.

Once H drive is opened, the student can find the saved file. Double click to open.
