KTEC partners with Snap-on to open Innovation Lab

Snap-on Tools and Leeward Business Advisors have collaborated with the Kenosha School of Technology-Enhanced Curriculum (KTEC) to develop an 'Innovation Lab' at its West Campus. It's an excellent example of business and education working together. The lab officially opened on January 26.

The goal of KTEC's Innovation Lab - seeded more than three years ago - was to create a maker space where real-world application, exposure to different career paths, and connecting to the community through collaboration can take place. That goal has been realized and today that lab has the necessary resources required for STEM learning and innovation including Snap-on tools, computers donated by Leeward Business Advisors, a 3D printer, presentation equipment, meeting areas, heavier equipment and much more.
